

# Phonak Fast Facts

## Speech in Car for AutoSense OS

### What is it?

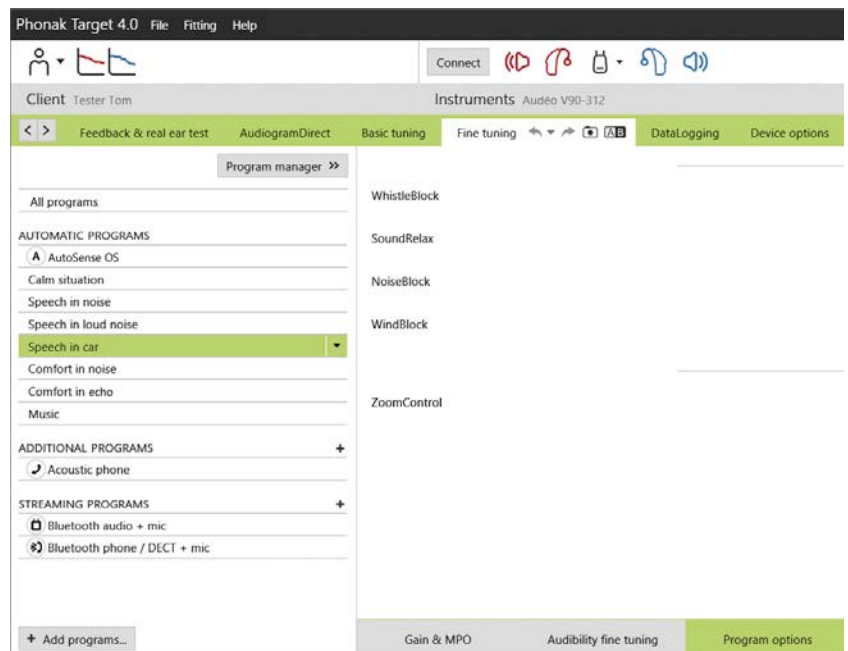

Speech in Car is a program within the Phonak automatic operating system, AutoSense OS. In a car, AutoSense OS will smoothly transition into the Speech in Car program.

### Why use it?

The benefit for your client is that their hearing aids will provide a comfortable, stable listening environment whether driving alone or with traveling with passengers, reducing listening effort.

### How do I use it?

In the Phonak Target 4.0 fitting software, the Speech in Car program settings can be easily managed in the Program options screen, allowing for program specific fine tuning of gain levels and features that will not impact any other programs within AutoSense OS.
