

Focus on your child's needs

The ability to focus in a classroom setting is crucial to a child's learning and early development. However, children with Auditory Processing Disorder (APD) have difficulty focusing on what's being said. Because their brains struggle to perceive speech sounds, hearing and responding to the speaker's words can be challenging. As a result, children with APD can easily become distracted and lack attentiveness.

Phonak has a solution that helps overcome these challenges.

With a rich history, Roger is an easy-to-use system that allows children and teens to experience the world around them, especially in the classroom. It is composed of a Roger microphone and receiver. Roger Focus II is the latest ear-level receiver for kids with APD. Roger Focus II lets children focus on what matters.

life is on

At Phonak, we believe that well-hearing equates to well-being and is essential to living life to the fullest. For more than 70 years, we have remained passionate about creating a world where 'life is on' for everyone. Our innovative hearing solutions are designed for people of all ages and all degrees of hearing loss, to connect socially, thrive mentally and emotionally.

Roger Focus II for APD

Focus on what matters

¹ Johnston, K., John, A., Kreisman, N., Hall III, J. & Crandell, C. (2009). Multiple benefits of personal FM system use by children with Auditory Processing Disorder (APD), International Journal of Audiology, 48:6, 371-383.

Listening performance at school and home

Phonak remote microphone technology offers children and teens with APD the opportunity for better speech understanding in the classroom. They can experience reduced listening effort and less anxiety around being in a classroom and interacting with their peers and teacher. This can substantially increase their level of engagement and communication in the classroom.¹

Roger Focus II portfolio

Rechargeable model

Zinc-air battery model

Peace of mind for parents of small children

- Available in a rechargeable model with no removable battery
- Tamperproof battery door for the Zinc-air battery model
- Designed to fit small ears (36 months and older)
- Indicator light showing device and battery status

Focus on flexibility with Roger™ microphones

Whatever your child's listening environment, there is a Roger microphone to meet their needs.

Roger Touchscreen Mic

Roger Touchscreen Mic features a user friendly interface for use in the classroom.

Roger Select™

Roger Select is a versatile microphone ideal for stationary situations where background noise is present.

Roger On™

Worn around the speaker's neck, placed on a table or held in the hand, the multiple microphones of the Roger On automatically reduce background noise, focusing on what the listener needs to hear.

Roger Clip-On Mic

The Roger Clip-on Mic is for parents of young children to use where noise or distance may make focusing difficult.
