Phonak Lyric relieves tinnitus faster than standard hearing aids.³

An estimated 10–15% of a population has tinnitus but most cases go untreated.⁴ This is due to a lack of information and the fact that most people are unaware of who will understand their complaints and assist them. While some cases are minor, some require more specific treatment to overcome possible long term effects.

24/7 benefits for tinnitus

Although there is no cure for tinnitus, you'll be relieved to know that there are various effective forms of counselling and treatments available. Once you decide to seek help the first step is to speak to a tinnitus specialist near you for more in-depth information. Tinnitus is something that can be present 24 hours a day and amplification is one option to relieve tinnitus symptoms.

The Lyric effect

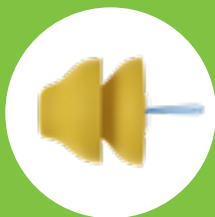

Reduces tinnitus annoyance **faster**
than daily wear hearing aids³

Improves **sleep quality**³

Provides **greater** relief from tinnitus than daily wear hearing aids⁵
