

Boost your hearing at work

Do you have difficulties hearing at work?

We spend a good portion of our day at work, so hearing well is integral to having a productive day. Our range of Roger solutions can help improve your hearing over distance and noise so you can focus on work rather than on hearing.

You could be eligible for the Commonwealth government's Job Access program. [Learn more below.](#)

Why do you need Roger?

Today's hearing aid technology does an excellent job of improving speech understanding. However, 31% of hearing aid wearers report they still have challenges hearing in noisy situations.<sup>1</sup>

Roger technology is designed to boost the performance of hearing aids and cochlear implants, regardless of background noise or the distance to the person talking, by picking up the voice and transmitting it wirelessly to the listener.

Adaptive to sound

If the noise level increases, Roger adapts accordingly, keeping the voice of the person talking above the background noise.

Improved speech understanding in group conversations in noise<sup>2</sup>

If the noise level increases, Roger adapts accordingly, keeping the voice of the person talking above the background noise.

Access to multiple talkers

MultiTalker Network allows several Roger microphones to be used together, providing you with access to multiple talkers in any situation.

Wireless microphone options

Roger On™

Experience the hearing performance with our latest microphone. With its ability to distinguish the direction of incoming speech and Pointing mode 2.0, users have the flexibility to focus on the conversations that truly matter. It can be placed on a table, held in the hand or worn by a presenter. Personal settings is easily handled with the myRogerMic app.

Roger Table Mic

Designed for meetings; multiple microphones can be connected in a MultiTalker Network to cover large meetings. It selects the person who's talking and switches automatically between the meeting participants.

Roger Select™

Can be worn by a presenter or placed on a table. When multiple conversations take place, the listener can manually select whom to listen to.

Receiver options

In hearing aids featuring RogerDirect™ the receiver can be installed directly. No need to add an external receiver. For other hearing aids and implants there are several types of receivers available.

Hearing aid with RogerDirect

Roger NeckLoop

Design-integrated

Ask us about an obligation-free trial of any of our Roger products.

Our qualified team of Audiologists are able to help you find the right solution for you.

Commonwealth Job Access program

Roger systems may be reimbursed for work as part of the Commonwealth government's Employee Assistance Fund (EAF). Call us on <phone no> to check your eligibility and how to apply.
