PHONAK
life is on

I feel good.

Serenity Choice™ Motorsport reduces wind and engine noise contributing to your well-being.

Phonak Serenity Choice™ – The high-end hearing protection solution from the hearing care specialist.

Riding is all about the thrill. But wind noise can get really loud—up to 98 dB at just 74 mph (119 km/h) under a helmet, or 90 dB in a convertible. That's enough to affect your hearing in just 15 minutes.¹

Enjoy your ride while taking care of your hearing.

Bikers often suffer from loss of hearing, but you may be surprised as to why.

Many bikers suffer hearing loss — not from the roar of the engine, but from the wind. Even helmets, while essential for impact protection, do little to shield your ears from wind. And wind noise under a helmet can reach 98 dB at just 74 mph (119 km/h). At these levels, hearing damage can occur in as little as 15 minutes. In convertibles, it can hit 90 dB at 75 mph (120 km/h).

Serenity Choice™ Motorsport reduces wind and engine noise while preserving situational awareness. It helps reduce your risk of hearing damage, so you can enjoy the ride without compromise.

Available in three standard sizes for occasional use, or as a custom-moulded Serenity Choice™ Plus version for regular riders seeking maximum comfort and protection.

¹ Why Are Motorcycle Riders at an Increased Risk for Hearing Loss?
July 2024, Germany's automobile association (ADAC).

life is on

Since 1947, Phonak is dedicated to preserving social, emotional and physical life quality by opening new acoustic worlds. We believe that well-hearing equates to well-being and thus is essential for living life to the fullest. Today we offer the broadest portfolio of innovative hearing solutions. And, together with our hearing care professionals, we keep on focusing on what matters most: improving speech understanding, changing people's lives and having a positive effect on society as a whole.
